

PRESS RELEASE 27 March 2015

ONE Introduction

ONE specializes in Audio, Video, Information and Communication Technology. In this field of expertise, the company offers a substantial range of advisory services, project realization, support and product development, all overseen by industry experts with years of experience in their respective fields. **ONE** clients are owners, management companies and builders of yachts and luxury real estate.

The **ONE** team is an experienced group of specialists that are in the forefront of research & development while being practical in their approach to solutions for human interface and operational reliability.

ONE is a purpose-focused group of subsidiary companies, which together support the parent brand goals while remaining independent in the scope of work and sensitivity of client information.

Management of **ONE** is in the hands of well-respected industry professionals, Arjan Kleinveld and Andre Klepper, both passionate about innovation, technology and efficiently meeting the needs of high profile clients.

With the underwriting of *Wright Maritime Holdings LLC*, a *WMG* partner, **ONE** has deepened its business experience and corporate values. The direct result is sustainability with consistent business practices for excellence.

ONE is determined to provide exceptional service while achieving the clients' best interests.

Arjan Kleinveld

Arjan's 20 years of professional experience began at the *Van Lent shipyard* at The Kaag in the Netherlands. As a technical trainee for *Van Berge Henegouwen Installaties (VBH)*, Arjan was on the project team for a 60m Feadship motor yacht. It was love at first sight with the yachting industry and so began a long and close relationship with *VBH*. After graduating from university Arjan joined the four-person team at *VBH*. Both the yacht business and technology demand grew exponentially in the years that followed, facilitating an immense learning curve for the company and Arjan. Following *VBH's* sale to Imtech, Arjan was honored to run and grow the company into a new future. With an enthusiastic and professional team, Arjan full heartedly enjoyed leading the company in the proceeding four years before deciding to pursue his entrepreneurial ambitions elsewhere with the foundation of **ONE**.

Andre Klepper

From a young age Andre was fascinated with computer technology, often tweaking the personal computers of his friends and family. The fascination never quite went away, and he quickly embarked upon a career as an IT professional in the yachting AV&IT industry. Throughout his seven years spent at *VBH* as team manager and CTO, Andre had the pleasure of working on several prestigious vessels ranging from 40 to 180 meters in length. He designed and implemented some of the most advanced yacht IT networks ever installed. His competences were seen and embraced by several leading IT companies, which led to many successful partnerships. Eventually Andre started to turn his attention to his own technology company. That dream was realized in 2014 with the start of *YachtCloud*.

After successfully working together for many years, Andre and Arjan joined forces in **ONE** and *YachtCloud*.

For further information, please contact **ONE**.
